

INTERNATIONAL SOCIETY OF HETEROCYCLIC CHEMISTRY  
DEPARTMENT OF CHEMISTRY  
THE UNIVERSITY OF NEW MEXICO  
ALBUQUERQUE, NEW MEXICO 87106

NEWSLETTER MAY 1970

Dear Member:

This Society was established in September 1968 and since that time has experienced steady growth which we expect to continue in the future with your support. Now that we are approaching our second anniversary and have the problems associated with organization and initial development behind us, we wish to report to you concerning the functional aims of this organization.

Annual Dues. In order to function it is necessary to have some financial support. The initial dues for membership in this Society were \$3.00 US. Regular annual dues for membership have now been established also at \$3.00 and 1970 dues are now payable. July 1 has been established as the annual due date. Persons who joined the Society after July 1, 1969 are considered to be paid up for 1970. Dues for 1970 for persons who joined before July 1, 1969, and who wish to continue membership are now payable. A form has been provided on page 2 for your convenience. Your personal check will be your receipt. If remittance is in the form of a money order, UNESCO coupons, cash, or check other than your personal check, a receipt will be forwarded to you.

International Congresses of Heterocyclic Chemistry. As previously announced in the Journal of Heterocyclic Chemistry, the major function of this Society is to serve as the sponsoring agency for the International Congresses of Heterocyclic Chemistry. The Third Congress, which is to be held in Sendai, Japan, August 23-27, 1971, will be sponsored by this Society in conjunction with The Pharmaceutical Society of Japan and The Society of Synthetic Organic Chemistry, Japan.

Newsletters. One of the functional aims of this Society is to serve as a medium for the circulation of announcements of meetings dealing with heterocyclic chemistry as well as other notices which may be of interest to heterocyclic chemists. Therefore, beginning in September 1970 and continuing each year, two newsletters will be mailed to members of this Society. These newsletters will be mailed about September 1 and March 1. Persons who wish to have an announcement appear in a particular newsletter should send it to Mrs. Miriam Mahn, Department of Chemistry, University of New Mexico, Albuquerque, New Mexico 87106. Deadlines for receipt of announcements are August 1 and February 1 for the respective newsletters.

Announcement of Meetings.

1. The Third International Congress of Heterocyclic Chemistry, Sendai, Japan, August 23-27, 1971. Information regarding this Congress is enclosed.

Charter Flights to the Third Congress. A charter flight from the United States is planned by the Division of Medicinal Chemistry of the American Chemical Society. Information regarding this flight is enclosed to persons residing in the United States and Canada. In addition, a form is enclosed for persons who wish to participate in this flight. This form should be completed and forwarded to Dr. Ruth R. Levine.

A charter flight from Europe is also being planned and is under the direction of Dr. R. W. Balsiger, 8, Heckenweg, Berne, Switzerland. At this time additional information is not available and it is suggested that interested persons write directly to Dr. Balsiger.
