More History:

TO: Professor Stan Lang (2001)

FR: Professor Townsend

The first congress was held in Albuquerque in 1967 and the President of the Congress was Raymond Castle. There was no formal society (no constitution, by-laws, elected officers, etc.). All decisions were made by R. Castle with advice from the editorial board of the "Journal of Heterocyclic Chemistry" and supported by Miriam Malm as corresponding secretary. Of course, Raymond was the editor and owner of "The Journal." This arrangement was continued for the first three congresses, e.g., I was selected at the editorial board meeting in Sendai during the third congress to host (be president of) the fourth congress in Salt Lake City. During my organization of the fourth congress, it was decided by R. Castle, E. Elslager, R. K. Robins and myself to

complete the long overdue formalities involved in establishing the "International Society of Heterocyclic Chemistry". The "first society business meeting" was convened during a luncheon on the 10th of July 1973 at the fourth congress in Salt Lake City. The slate of proposed officers was introduced and nominations were solicited from the floor. The proposed slate of officers was accepted by unanimous acclamation and Raymond Castle became the "first" president of the ISHC on 10 July 1973; Edward Elslager the second; Miha Tisler the third; Leroy Townsend the fourth; etc.
